The Secret Getting Building Costs Down...

When you need a bid on a Mechanical Air Handling, Ventilating, or Air Conditioning System, go directly to the source that can give you the most competitive price and service – your SMACNA Air Handling Contractor.

With a SMACNA CONTRACTOR, you eliminate the third party markups and deal directly with those experienced, educated and capable of producing and installing an air handling system. Separate
Air Handling
Bids

- SMACNA CONTRACTORS customize the air handling system for your specific requirements.
- •SMACNA CONTRACTORS provide shop drawings so other mechanical trades can properly install their work.
- SMACNA CONTRACTORS coordinate the assignment of other mechanical services without jeopardizing your control over separate bids.
- SMACNA CONTRACTORS are leaders in the field, continuously researching for better and more efficient ways to offer Mechanical Air Handling services.

SMACNA CONTRACTORS believe it is our responsibility to give our customers our most competitive price, performance, quality and efficiency. If that's what you need, give us a call.

3221 W. Big Beaver Rd. Suite 305 Troy, MI 48084-2896 (248) 649-5450 Fax (248) 649-2024

It's time we utilized the utmost cooperation in developing efficient building costs.

THE BEST BUILDINGS ON EARTH ARE STILL BUILT BY HAND

More than a million bricks laid in a series of unique patterns, textures and colors make the Veterans Administration Health Care Facility in Detroit, Michigan, a striking example of masonry design by architects Smith, Hinchman & Grylls Associates. But masonry was chosen for more than its beauty and flexibility of design. Buildings built of masonry by skilled union craftworkers will outperform, outshine and outlast any others. Add to that the speed and efficiency of union masonry contractors, and you have a prescription for health care facilities that satisfies any schedule and budget. We're The International Masonry Institute, and we'd like to help you design and construct the best buildings on earth. Visit us on the World Wide Web at www.imiweb.org, or call us toll free at 1-800-IMI-0988 for design, technical and construction consultation.

MAKING CONNECTIONS

Last year in this space. I reported on the effort to make connections with our members and our clients by enhancing the delivery of this directory issues of PLACE! We sought to publish the same information in both written and electronic formats by using the AIA Michigan website. We hope that you have had a chance to sample the website information and to make connections electronically. Now it is time to do more.

AIA Michigan has made a commitment to the membership to bringing more and better information to your electronic doorstep. We propose to grow the size and depth of our website to include value for all members, and to make the website a communication tool for now and the future. This initiative has been presented to your chapter leadership and discussed by the AIAM Board. The missing ingredient is the input from individual members on what they need and what they value.

For that reason, we have put together this simple three-step plan for soliciting your input:

- a. Log on to our website (aiami.com) and spend some time exploring what we have and the links that have been created.
- b. E-mail us (Mike Mosley, AIA is our "webmaster") with your thoughts and ideas as to what is good, bad, or lacking on the site. Phone calls or faxes are just as good.
- c. Make an effort to discuss within your firm and also at a chapter meeting what new information postings will create value for you and your practice.

PLACE magazine will continue to be published periodically as will our AIAMI newsletter, the Bulletin. They will be, however, only a part of the information puzzle of the future. The electronic distribution of information via the web is a commitment that must be made, and will become an increasingly large piece of that puzzle.

Clearly, the virtue of this mixed communication package is one of timing. Lead time for posting info on the web is a matter of days (sometimes hours) in contrast to the newsletter (weeks) and the magazine (months). With your cooperation, we hope to facilitate the posting of your info by you, instantly. Your chapter news, activities, calendar, etc., etc., can and should be shared with all members. We need your help because now is the time to do more - to do more faster, easier, and with greater value. Let us know what you think.

Welcome to the directory issue of **PLACE** Magazine, the only directory of its kind in the State of Michigan. Its main purpose is to aid prospective clients to find a design professional that will serve each client's special interests and needs. The listing is not only a name and address source, it also includes the specialties our members practice under.

The individual names and firms being represented through the American Institute of Architects, AIA, are architects who care very deeply about the continued professionalism and quality of services our members provide. These architects, through their extensive educational training and apprenticing, are equipped to handle the multitude of tasks associated with the built environment.

The architect is equipped to assist you in your building project from start to finish, in all aspects and disciplines throughout the design and build process.

- · Starting with a needs evaluation and site selection.
- · Programming and planning,
- The designing process, including schematic design and design development,
- Construction document preparation; the plans and specifications portion of the architect's work,
- Assisting in the bidding and negotiations phase with the various contractors bidding a project,
- Construction administration to assist with proper execution and interpretation of drawings and specifications,
- · Building commissioning and startup,
- · And move-in management

All of these steps are important parts of the process. The architect represents your keen interests and needs for your particular project. The services we offer are aimed to help get you up and running in your new facility.

The architect has the distinct pleasure of working with a multitude of design professionals with the expertise to bring complex projects to completion. From the very specific site issues, site selection and site design, to the building and its particular attributes, right on through to the final interior design and finishes and furnishings all are paramount issues requiring adept handling in order to obtain the complete and successful project that you expect.

The American Institute of Architects, through their association, requires the greatest level of professionalism and ethics. Members are obligated to stay informed, up-to-date, and constantly learning. To accomplish this, we have a mandatory continuing education program.

This exemplary program keeps the profession in the leadership role that it has sought and maintained.

Whether you are building a place to call home, a place for worship, a place to work, a place to rest, relax or have fun — the place is yours and it will also touch everyone else out there. It is extremely important for it to be done right the first time. The architect is trained to produce the best possible building for its particular site. My AIA colleagues and I look forward to working with you in creating the best Place that it can be.

AIA MICHIGAN

A Society of the American Institute of Architects

AIA Michigan stands behind its members with a wide range of programs. AIA members benefit from services that keep them informed, protect their interests, increase appreciation of the role that the architect plays in protecting the health and safety of the public and provides the architect with the tools that heighten their efficiency and effectiveness.

AIA MICHIGAN MISSION

The Mission of AIA Michigan is to organize and unite its members to continuously improve the profession and to enhance their positions as leaders of the building team and designers of the built environment. This Mission is achieved by means of:

- Public Advocacy by developing and disseminating policies that enhance the natural and built environment; and by influencing legislation and regulatory policy that impacts the effectiveness of the profession.
- Education of the public to the value of the profession; education of members to a higher standard of practice; and education of students to the changing needs of the profession.
- Fellowship through activities that promote inter action between the members and allied professionals.

OUR FOCUS

PUBLIC ADVOCACY

As the collective voice of the architectural profession in the state, AIA Michigan makes sure that its concerns and interests are heard by key decision makers in Lansing. AIA Michigan monitors of all regulatory matters affecting the profession.

Communications/Government Affairs - This committee and a legislative counsel in Lansing works to produce positive results for the profession. Ongoing activities include the monitoring of legislative issues for interior designers, landscape architects, homebuilders, and school construction. A plan has been developed to

strengthen and build industry coalitions among the members of the construction industry.

AIA Michigan has a video that was produced to raise the public's awareness of the value of hiring licensed architects. "Architectural Update" is available to legislators, community organizations, other special interest groups, and is available for sale at \$9.95 plus shipping and handling.

<u>Professional Licensing</u> - Efforts to enforce licensing laws and prosecute unlicenced practitioners is an ongoing priority.

Minute Person Program - Every member is listed in a data base by home address and congressional district. This makes it possible to contact members immediately for crucial Legislative Alerts.

Architects' Political Action Committee (APAC) - Funds are raised, separate from dues dollars, to be used to support the campaigns of legislative candidates who understand the important role that architects play in creating a liveable environment for Michigan.

EDUCATION

AIA Michigan boosts the public's awareness and appreciation of the unique services and contributions that architects provide, enhancing visibility and stature among both clients and the community.

<u>Continuing Education</u> - Continuing education is a mandatory requirement for AIA membership. AIA Michigan offers educational programs throughout the state to enable every architect to attain the required credits.

<u>Design Conference</u> - Architects present their work in a relaxed, informal setting at Torch Lake each Fall. Camaraderie, young architects, lesser known firms and affordable prices take a front seat.

EXPO - AIA Michigan has joined with several other organizations to sponsor the largest building industry show of its kind in Michigan at the Silverdome each February.

Intern Development Program (IDP) - AIA Michigan coordinates chapter activities and works with national AIA on this mandatory program.

FELLOWSHIP

<u>Honor Awards</u> - This 34-year-old program promotes Michigan architects by raising the public's awareness of design excellence.

Mid-Summer Conference - This family-oriented conference celebrated its 57th year on Mackinac Island in August of 2000. It is a major fund-raising event. Architects are joined by engineers, contractors and vendors.

Receptions - Two receptions are typically hosted each year, The Holiday Open House at the Beaubien House in December. The other is in May to recognize the newly elected members of the College of Fellows. These events are important social occasions that promote fellowship and celebrate architecture.

Recognitions - The achievements of individual members are recognized through the AIA Michigan Gold Medal, the Hastings Award, the President's Award, and Young Architect Award. Honorary Affiliate membership is conveyed upon people who have made notable contributions to architecture but are not otherwise eligible for membership.

SERVICES

Architect Referral - Firms and individuals calling AIA Michigan in search of an architect are handled on an individual basis. PLACEMAKERS is sent to them as a resource for licensed architects

<u>BOCA Library</u> - A resource library of building codes is retained in the Beaubien House through the AIA Detroit Building Codes and Regulations Committee.

<u>Bulletin</u> - The newsletter is a vehicle for internal communication and is mailed to all members.

<u>Documents</u> - AIA Michigan is a full-service distributor of contract documents, available at special prices to members.

Insurance - In Michigan, special group rates on homeowners and auto insurance are available through Michigan Benefit Plans, Inc., and a cellular savings program is offered through Cellnet Cellular. Information is available on the AIA Benefit Trust and professional liability insurance as well. Job Referral - AIA Michigan keeps resumes on file and publishes want ads in the newsletter for architects seeking job opportunities.

Membership Directory - Published annually, the membership directory will be included in an upcoming issue of PLACE magazines.

PLACE - The official magazine of AIA Michigan is distributed quarterly to architects and potential clients. PLACE-MAKERS, a directory of architectural firms is published in the fall.

Profile - The AIA Profile Directory of architectural firms and architects nationwide is available at the Beaubien House.

WEB Page - AIAMI.COM contains most of the information that is in the directory and includes photos of the most recent design awards, a listing of the members and their firms and information on upcoming programs. AIA contract documents can also be ordered on the WEB.

Since 1887 in Michigan "AIA" after an architect's name means that this person is an honorable member of the American Institute of Architects. It is a proud tradition and it will become more important in the 21st Century.

WHAT IS AIA/CES?

It is a continuing education system that emphasizes learning that was developed by the AIA. It is a mandatory requirement for architect membership in AIA. The CES is dedicated to creating a strong profession. It enables the architect to keep current, master new knowledge and skills, plan for the future, and responsibly meet the role society entrusts to a professional. It identifies AIA members as architects who seek the highest level of knowledge and achievement.

What is a Learning Unit (LU)? (Revised)

The AIA records continuing education credit as a Learning Unit (LU). An LU/hour educational program is equal to one contact hour. This LU model was approved by the AIA Board of Directors beginning January 1, 2000. A LU is not a Continuing Education Unit (CEU). A point one CEU (.1) is equal to one hour or one LU. One CEU is equal to ten hours or 10 LUs.

What is required of AIA Members?

Members can earn credit (learning units = LUs) by attending programs offered by AIA/CES registered providers or through self-reporting.

- A. Program descriptions reported by the CES Providers are sent to our national recording AIA/CES center in Oklahoma prior to the event. Upon the completion of the program, CES Provider's then verify and report the attendance of those AIA members participating in the event. Due to the variation of reporting dates and the increasing number of state licensing requirements, we now request that the CES Providers submit attendance records within 14 days of the program conclusion. Programs vary from chapter meetings to in-firm lunch programs to week by manufactures, conferences universities, professional organizations, etc. Faxing attendance verification from a program site is most preferable.
- B. Member self-reported activities must now indicate either:
 - Self-Designed Activity, the learning activity is organized by the member specifically to meet the members individual needs. A selfdesigned activity frequently involves more than one type of medium or method such as

research, reading, interviewing subject experts, and/or viewing videos. To determine what qualifies for self-reporting ask yourself the following questions: (a) Is this a planned learning activity? (b) Is this activity intended to be educational or operational? (c) Is this new knowledge for you or are you sharing your knowledge with others? (d) How will you apply this new knowledge to your practice? This method is not acceptable for health, safety, and welfare (HSW) credit. Some state licensing boards will not accept this type of reporting for mandatory continuing education (MCE) requirements. report forms should be sent to the AIA/CES office at the University of Oklahoma. {Recommended minimum of three hours} Or:

 Structured Self-Reported Program, this is a structured activity offered by an organized, third-party, non-CES Provider. Documentation of attendance/participation will usually be required as supplement when reporting this activity as a state licensing requirement. For members who self-report a structured activity the AIA is unable to assist in supplying any support materials required by a State Licensing Board MCE audit.

Members may select the appropriate format of the learning activity and return the completed AIA preprinted Self-Report Form so that the data can be entered accurately into their individual transcripts. Members calculate LUs for self-reported study by reporting the number of hours spent in architecturerelated learning.

What is mandatory continuing education (MCE) and how does it affect my state license? (Revised)

lowa was the first state (since 1979) to require mandatory continuing education (MCE) for architects as well as for other professionals licensed in the state. Alabama 1993 was next, then Florida 1994, Kansas 1996, Arkansas, Tennessee, and South Dakota 1997, Kentucky, Louisiana, North Carolina, and West Virginia 1998, and Minnesota, New Mexico, Oklahoma, and Vermont in 1999. These states have all adopted and implemented mandatory continuing education requirements.

State requirements vary. Alabama, for example, requires 12 hours per year. Florida requires 20 hours every two years. Except for Kansas, each of these states require that 8 - 12 of these hours be in the area described as health, safety, and welfare (HSW). Louisiana and North Carolina have a requirement of 12 hours of HSW per year. Twenty more states are at various level of discussion indicating their intent to implement a mandatory continuing education (MCE) state license requirement. This means architects who intend to practice within those states must have continuing education either annually or biannually. Each state has the legal right to establish its own guidelines and requirements. The average AIA member has four or more state licenses. For AIA members, this means that our single record-keeping system is the documentation that is needed for reporting to your state(s). We do however, strongly suggest that you keep back-up documentation of your activities to support your claims, especially if the credit is by means of self-reporting. The AIA or the state licensing boards may require you to show evidence.

How does health, safety, and welfare (HSW) tie into CES?

The AIA requires eight (8) contact hours of the basic LU requirement be earned in the area of health, safety, and welfare, which is defined as those issues addressed by the Architecture Registration Examination (ARE). Health, safety, and welfare in architecture are hereafter defined as anything that relates to the structure or soundness of a building site. This requirement is based on states having the power to grant professional licenses as a means of protecting the life, safety, and welfare of the public.

Examples:

- A. **Health**: Aspects of architecture that have salutary effects among users of buildings or sites and address environmental issues. Examples would be appropriate air temperature, humidity, and quality; adequate provisions for personal hygiene; and nontoxic materials or finishes.
- B. **Safety**: Aspects of architecture intended to limit or prevent accidental injury or death among users of buildings or sites. Examples would be the provision of fire-rated egress enclosures, automatic sprinkler systems, and stairs with correct rise-to-run proportions.
- C. **Welfare**: Aspects of architecture that engender positive emotional responses among, or enable equal access by, users of building or sites. Examples would be spaces whose scale, proportions, materials, and color are pleasing for the intended use; spaces that afford natural light and views of nature; and provisions for users with disabilities.

What is the relation between HSW and state mandatory continuing education requirements (MCE)? (Revised)

Both the AIA and state licensing boards base their programs on the contact hour. A majority of states are requiring eight (8) contact hours of HSW for their MCE. (Exceptions: Kansas, none; Louisiana, Minnesota, North Carolina, Oklahoma, and Vermont require twelve (12) contact hours.) The AIA/CES requires eight contact hours of HSW from a

structured provider. Some states allow some forms of self-reporting. Due to the quality assurance issues posed by the states, the AIA no longer accepts self-designed reporting for HSW credit.

Caution! For members' self-reporting structured activities and for AIA/CES Registered Providers, it has become very important that you clearly report all HSW programs and activities. The failure to do so could result in architects losing their licenses for noncompliance of state license MCE requirements.

Annual CES Requirement (Revised)

All active AIA members must successfully complete 18 LU hours (including 8 hours of health, safety, and welfare issues) CES requirement for annual membership renewal. This will retroactively affect 1998 and 1999 records. A member who fails to meet the annual requirement will be given nine months to earn the deficient LUs and meet the current annual requirement of 18 LUs.

A member who exceeds the annual requirement in a given year may carry up to 18 LUs (including 8 hours of HSW) into the next year. Members' CES carryover credits allow only as many hours as needed to fulfill the annual requirement.

AIA/CES Reinstatement Policy (Revised)

A notice of non-compliance goes out March 31st of each year. Members who desire to reinstate must obtain 9 LUs prior to applying for reinstatement. These must have been completed within at least one year of the date of applying for reinstatement. The reinstated member must also obtain 18 LU hours (including 8 hours of health, safety, and welfare issues 'HSW') for the current membership year for a total of 27 LU hours. Any LUs in a member's record will be dropped on the date of lapsed membership due to noncompliance with the continuing-education requirement. AIA reinstatement does not necessarily meet state licensing requirements.

There are three exceptions: Severe medical difficulties for at least the last three months of the probation year, or unexpected/non-permanent overseas assignment for more than six months or the last three months of the membership year, or severe financial hardship. The above exceptions and other unusual circumstances must be reviewed by the member's component and its findings submitted to the CES Audit/Review Committee.

How Are Records Kept and How may they be Accessed?

The AIA/CES has incorporated an automated recordkeeping and transcript service provided under contract by the College of Continuing Education at the University of Oklahoma, Continuing Education, AIA/CES, Room B-1, 1700 Asp Avenue, Norman, OK 73072. Information line: 800/605-8229, fax: (405) 325-6965.

You may request information in writing by phone or fax. Major services include maintenance of individual members' continuing education activities and information support about CES for members and providers. CES credit summaries will be mailed each March to every AIA member with CES activities during the past calendar year. Individual transcript records are now updated daily on AIAOnline via the World Wide Web: www.e-architect.com < continuing ed>,

found under "Check Your Transcript" and available to each member by using his or her member number. (Names and addresses are not listed for privacy reasons.) An additional hard copy of the transcript can be faxed or mailed to a member for a \$10 fee per copy.

How else can the Internet and AIAOnline help with CES?

Members and AIA/CES Registered Providers can now access AIA/CES through the Internet AIA Home Page www.e-architect.com <continuing ed>.

CES Transcripts: AIA members can review their up-todate transcripts at any time.

Is it possible to get credit for teaching? (New)

The AIA/CES policy regarding credit has changed effective January 1, 2000. What is new is that for those members who teach a program, a class, give a presentation one hour or longer, they can self-report the topic as a "Structured" event. If the topic relates to HSW, members can claim the HSW credit. This new policy applies to all individuals except those who teach the same program on a full-time basis, such as a full-time university professor. The second option is as before. AIA members can self-report the research and preparation time for programs that they teach. The research must be reported as "self-designed" and regardless of the topic, it will not qualify for HSW credit. Members must select just one option, either teaching credit or research, but can not claim both for the same event. Caution: Check with the Licensing Board in those states that require MCE. Several states do not allow credit for teaching.

CES IN MICHIGAN

AIA Michigan is a Registered Provider. Providers are responsible for developing quality educational programs and reporting the attendance. Accessible and affordable are the keys to AIA/CES effectiveness. Programs like the highly successful Health Facilities Planning Seminar (now in its 35th year) are an excellent way for the architects to satisfy the AIA/CES requirements. It is sponsored annually by AIA Michigan and Michigan Department of Public Health. Participants receive valuable information for use in daily practice and meet client representatives at the same time. The cost is very affordable. AIA Michigan has modeled other programs on this format to provide a wide variety of continuing education opportunities.

Where can I get help?

The above information is a digest of the CES policy. Detailed information and assistance may be obtained from both the national AIA and your local chapter. The national AIA has established a hotline to provide a source of information and respond with requested materials and forms. A recorded message instructs callers to leave a message with their requests. The hotline number is (202) 879-3089, or contact Thom Lowther, director, CES. You can call (202) 626-7478, email; tlowthert@aia.org or fax to (202) 626-7399.

Ways to achieve your annual LUs

- Learning how to computerize your operations? Take a computer course? Learn about the latest CAD software? Record it!
- Attend an AIA or CSI educational chapter or regional meeting. Contact your local chapter for a schedule of their educational programs.
- Read a special, pre selected article from Architectural Record. These learning activities model the medical profession's continuing education format. Or AlAOnline.com>Continuing E
- Attend "Brown Bag" or "Lunch-n-Learn" activities at your office. (E.g., an educational presentation on roofing materials.)
- Teaching? If it is not a full time job, record the program you teach or the time you spend researching new knowledge (E.g., codes, designs, structures, etc.) to prepare for a presentation. (Revised)
- On the road traveling? Planning a tour of a city? Identify in advance what you want to learn and then report your architectural learning opportunities. (e.g., a tour and description of the historic preservation of old plantation houses while visiting historic Charleston.)*
- Spending time researching the latest codes or specifications for a new project? What new knowledge do you hope to gain that you can apply toward your profession? Record time spent researching this new knowledge for a committee or community group.*
- Attend a PIA conference. The 21 different PIA's sponsors offer over 40 continuing education programs a year, all over the country. Call the PIA Information Line at 800-242-3837.
- eClassroom. Missed the AIA National Convention?
 You can now even take a course over the Internet at your convenience 24 hours a day, check out AIAOnline, Continuing Ed.
- Attend the AIA national, state, or regional conventions.
 The AIA National Convention 2001 will be May 17-20, 2001, in Denver.
- Complete an NCARB monograph and test. Contact them at (202) 783-6500.
- Refer to www.e-architect.com <continuing ed> for AIA Continuing Education System (AIA/CES) programs, eClassroom programs and reporting forms. Listed are conferences, seminars, workshops, and ongoing appointment programs you can attend or bring into your office. New ones are added every day!

MICHIGAN ARCHITECTURAL FOUNDATION

Members and Friends of the Michigan Architectural Foundation:

2000 has been an exciting and formative year for the Foundation. Growth of existing fund raising programs and expansion of activities in support of our Mission Statement goals would have in itself indicated a very good year. But in 2000, the Trustees decided to accept the challenge of examining the fundamentals of the Foundation by initiating a program of strategic planning. The Trustees, special consultants, educators, contractors, historians, and interested architects, attended a number of special meetings to educate and create a vision for the future of the Michigan Architectural Foundation. Some of the general goals decided on were:

- Create \$500,000 endowment by 2005.
- Develop \$1,000,000 in assets by 2005.
- · Diversify board composition.
- Leverage the influence of the Michigan Architectural Foundation.

This year was spent gathering and formalizing information from many sources. The next year will be spent establishing priorities and developing strategies for possibly refocusing the initiatives of the Foundation. Stay tuned!

The Board of Trustees and I wish to thank you for your support during this year and look forward to your continued participation and assistance in the pursuit of the goals of the Michigan Architectural Foundation mission.

Phillip E. Lundwall, FAIA
President
Michigan Architectural Foundation

Mission Statement

The mission of the Michigan Architectural Foundation is to stimulate public awareness of the value of architecture; advance architecture through research and education; and enhance the quality of life through an improved natural and built environment.

The Foundation actively solicits funds and is seeking support from members of the profession, allied arts, the construction industry and all those who see their lives affected by architecture and the environment.

HIGHLIGHTS

ORGANIZATION

Membership, Structure and Fund Raising

The membership of the Foundation is composed of the members of AIA Michigan. The Board of Trustees of the Foundation is composed of four members of the AIA Michigan Board and five AIA Michigan members elected-at-large.

To develop funds to support the Mission Statement of the

Foundation, the Foundation sponsors a variety of programs and fund raisers. The main source of income to the Foundation in addition to the seminar revenue, continues to be the money derived from the accumulated assets and investments of the Foundation that have been generated in the past.

Unsolicited gifts and donations to the Foundation, primarily through AIA Michigan dues check-off, though modest, indicate a growing awareness of the Foundation's growth and activities.

The strength of the Foundation's management has encouraged other funding agencies and foundations to join with the Foundation in future granting programs.

The Board wishes to thank all the members of AIA Michigan and all the contributors for their support of the Foundation Trust Fund. In the past ten years, the Foundation has made great strides in expanding the goals of the Foundation for the betterment of Architecture.

Silent Auction

After a layoff of one year, the Silent Auction fund raiser was revived at the AIA Midsummer Conference on Mackinac Island under the chairmanship of Andy Vazzano.

Strategic Planning

This year the Foundation undertook a program of Strategic Planning in order to develop a long range plan for the future direction of the Michigan Architectural Foundation.

Northern Michigan Foundation President, Lyn Jenks, served as consultant and led us through the process of Strategic Planning, confirming the mission, strengths, weaknesses, opportunities, threats, creating, and using the vision.

John Gallagher of the Detroit Free Press graciously served as a moderator for each of the four individual sessions that focused on the four missions of the Foundation.

Special guests were invited to add depth and special insights to our discussions.

Next year the Foundation will be evaluating our funding, prioritizing our programs, and developing strategies to leverage our influence and better support the mission of the Michigan Architectural Foundation.

PUBLIC AWARENESS

Chapter Grants

Last year the Public Awareness Chapter Grants committee led by George Moutsatson, AIA recommended four grants to be awarded which the Foundation approved. They were:

- AIA Detroit PBS Broadcast: "Becoming a Good Neighbor"
- 2. AlA Huron Valley: Honor Awards Speaker.
- 3. AIA Flint: Cranbrook Tour.
- 4. AIA Upper Great Lakes: Architectural Drawing Exhibit.

Historic Grants

In accordance with one of its major goals, the Foundation funded a variety of historical awareness programs.

As in the past, the Foundation provided funds to support the 1999 Michigan Historic Preservation Network Conference held in Monroe, Michigan, April 22 through 24. The Foundation grant sponsored the keynote speaker. The conference continues to attract the largest attendance of professional and historic preservation activists of any historic preservation meeting in Michigan.

In February 1999, the MAF and the Clannad Foundation joined to create the David Evans Memorial Preservation Grant Program. The annual award of up to \$5,000 will be made to a not for profit (501C-3) organization that can demonstrate a creative solution to a preservation problem in Michigan. The award of \$5,000 to Shielding Tree Nature Center at Lawr Farm Restoration Project in Lake Leelanau, Michigan (a farmhouse restoration project) was presented at the AIA Michigan-Ontario Association of Architects joint convention in Windsor in April.

Communications

The Foundation's communication with the membership is limited to one mailer at the beginning of the year. This letter solicits support from the membership and thanks the

many contributors to the Foundation during the year. The Foundation is using the new one-point collection invoice for the members' dues to invite monetary support of the Foundation. A card mailing to all members this year resulted in a successful reminder for additional funding. We plan on using next year's invoice for a stronger appeal to our members at the time they contribute to the AIA. The AIA Michigan "Monthly Bulletin" continues to provide a communication link with the membership.

EDUCATION AND RESEARCH

AIA Michigan Presidents' Scholarship

The Fifth Design Build Golf Outing was held on May 21, 1999, at the Eagle Crest Golf Club, Ypsilanti. This year's event attracted the largest gathering of architects, engineers, contractors, construction managers, suppliers, and owner representatives since the start of the event. The income has raised money for the scholarship program and affords a larger stipend to the college recipients.

This outing was created as a scholarship fund raiser for the Presidents' Scholarship Endowment Fund. The goal of the Presidents' Scholarship fund is to establish the endowment of a sufficient investment income for several college scholarships. The Seventh Design Build /Presidents' Scholarship Golf Outing is scheduled for May 18, 2001, at Eagle Crest Golf Club.

One Presidents' Scholarship was awarded in 1999, another will be awarded in the Fall. Scholarships are awarded to students in an architectural program who exhibit leadership in their field as well as in community activities.

Michigan High School Design Competition

The 32nd annual Michigan High School Design Competition continued under the direction of James Shane, AIA. The design problem for this year was a Multi-Media Communications Training Center or "Mediatheque" near downtown Grand Rapids, Michigan. The program, including site photos, discussions, and other resources, was developed by a group of architects from Progressive AE and was available on the Internet - hosted by Progressive AE on their website. MAF is going high tech!

The program is co-sponsored by The College of Architecture and Design of Lawrence Technological University, the Detroit Edison Company, the Illuminating Engineering Society - Michigan Section, and AIA Detroit. The Program continues to attract the participation of students from high schools across the State.

This year the Foundation increased scholarship funding to \$4,500.

Special Grants

This year the foundation has agreed to sponsor the "AIA Guide to Detroit Architecture" - A scholarly yet readable look at hundreds of significant buildings and dozens of notable urban environments.

This exciting initiative is being led by MAF Trustee, Eric

0

3

Hill, Ph.D., FAIA, Executive Editor, and Co-Author. The guide will do the following:

- Raise the public's awareness of quality architecture in the region;
- Serve as a resource to local, national, and international developers interested in investing in Detroit and the Southeastern Michigan region;
- Supplement the city of Detroit's Tricentennial celebration; and
- Facilitate a unique collaboration of the professional architecture degree programs of three area universities.

The publication of this new guide will further all four of the directives of Michigan Architectural Foundation's mission.

INDUSTRY OUTREACH

Industry Seminars

The Foundation, in cooperation with other Associations, sponsors two programs, one for health care and one for educational facilities planning. These highly successful seminar/conference programs continue to bring together professionals, public and private officials, and the user groups in educational programs intended to generate better architectural design.

The Thirty-Second Annual Health Facilities Planning Seminar is the longest continual state seminar program devoted to one design subject in the nation. It was held last year in Grand Rapids at the Amway Grand Plaza Hotel in March with a very large turnout of architects, engineers, and health-care providers.

This year a Memorandum of Understanding between the MAF and the Michigan Department of Consumer & Industry Services was developed and entered into for the purpose of delineating the respective roles and responsibilities regarding development of the annual Health Facilities Planning Seminar. Special thanks to Robert Tower AIA, Steve Whitney, FAIA, Les Tincknell, FAIA, and MAF Executive Director, Rae Dumke, Honorary AIA for working so diligently to solidify this most important relationship.

The Seventh Annual Education Facility Planning Conference, under the chairmanship of Ralph Moxey, AIA, is held each year at the Shanty Creek Resort in October. This year the conference attracted the largest attendance overall, and participation by school officials and non-architect personnel increased. The program is gaining acceptance by school officials as an excellent source of planning material for the design and construction of educational facilities.

These programs are part of the Foundation's mission to advance the science and art of planning and building through research and education. In addition, seminar proceeds contribute significantly to the long-term financial stability of the Foundation and underwrite portions of our non-income producing programs.

Jeffrey Zokas, AIA
Chair of the Government Affairs Committee

AIA MICHIGAN GOVERNMENT AFFAIRS

Over the past fifteen years, architects across the country have become much more aware of the impact, our collective voice can have on legislative matters. Architects have also begun to see the value that pro-active political involvement can bring to our profession and our individual practices. Every State now has an active Government Affairs committee looking out for the best interests of AIA members across their state. In Michigan, the Government Affairs committee has been successful in fending off attacks on our licensing act, supporting interior design title registration and pursuing licensing violators. We have also been very successful in building strong coalitions with engineers. surveyors, landscape architects, interior designers, building officials and the General Contractors Association. These coalitions have helped to strengthen our collective voice in Lansing. As a result of these coalitions, we are jointly pursuing legislation that will benefit architects and engineers across the state. The following is a brief synopsis of the Bills we will be pursuing this year and next:

QBS

A Qualifications Based Selection (QBS) process allows the owner to choose the firm determined to be most qualified by objective criteria, whereas selecting design professionals only by the "low bid" takes this process out of the hands of the owner. The owner's challenge is to get a good "return" on the investment for design services. This could be achieved by selecting a qualified architecture/engineering firm and then negotiating the appropriate scope of work and compensation package which permits the architecture/engineering firm to produce a successful construction project.

OBS Advantages:

- · a well qualified firm is selected
- a scope of work satisfactory to both parties is negotiated
- · a mutually agreed-upon price is paid for the services

 a team approach (partnership) between the owner and consultant can be developed so that both parties have an interest in the project's success.

We are currently pursuing a OBS selection process in our State for government projects only.

Certificate of Merit

Architects and engineers face an unreasonable degree of liability exposure for breach of contract, property damage, personal injury, and wrongful death resulting from alleged negligence or malpractice in the course of their duties. Architects and engineers, whom most presume to have malpractice insurance, are also likely targets of suits from injured parties who seek relief from anyone that may even be remotely involved in the alleged death, injury, or damage. Many malpractice and negligence claims brought against architects and engineers may have no material basis or justification, in fact or in law. Nevertheless, these groundless suits are a source of considerable cost to architects and engineers in terms of direct expenses to defend these suits. The results are increased insurance premiums, lost productive time, and tarnished professional reputation.

Several states have been successful in curbing the number of baseless claims brought against design professionals by placing the onus of responsibility for screening out groundless suits on the plaintiff. Several states have adopted "Certificate of Merit" laws, which require the plaintiff to consult with a third party design professional to review the facts of the claim before moving it forward. The plaintiff must then file with the court, a certificate from the third-party design professional declaring that, based upon their review of the allegations, the third party design professional believes that there is a reasonable basis for the commencement of the action, and that the design professional has liability relative to this matter.

We are currently pursuing a sponsor and developing language for a certificate of merit rider to be attached to a, as yet to be identified, legislative bill in the House or Senate.

Workers Compensation Amendment

This would amend the current workers compensation laws affecting Architects, Engineers and Land Surveyors It would provide that no professional or their employees retained to perform professional services on a construction project, could be held liable in any action for injury resulting from a contractor or construction manager who fails to comply with safety standards on a construction project. This amendment would provide that no architect, engineer, land surveyor or their employees or a corporation. partnership, or firm offering architectural services, engineering services or land surveyor services, who is retained to perform professional services on a construction project, is liable in any action brought for injury resulting from the employer's failure to comply with safety standards on a construction project for which compensation is recoverable under the law. This amendment would not apply when responsibility for safety practices is specifically assumed by contract or by direct supervision relative to the segment of the job which results in the injury. The Immunity provided by this law, does not apply to the negligent preparation of design plans or specifications.

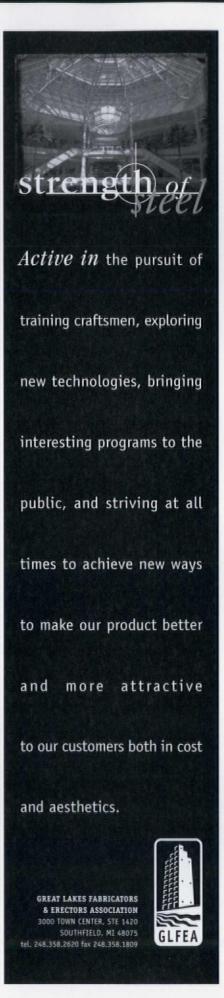

AIAM is currently pursuing a sponsor and developing language for a Worker's Compensation amendment rider to be attached to a yet to be identified legislative bill in the House or Senate.

School Construction Liability

In 1936, Public Act No. 306 was created to safeguard the design and construction of school buildings. This law required the state fire marshal to review the plans and specifications and inspect the construction of the school at least twice during construction. The Act also made the architect "responsible for constructing the building of adequate strength so as to resist fire, and constructing the building in a workmanlike manner, according to plans and specifications as approved". Current Office of Fire Safety plan reviews, include a note which states; "The school building law requires the Architect or Engineer of record to assume all responsibility for the project through occupancy of the facility". This law imposes construction liability on an architect's shoulders that your standard professional liability Insurance will not insure.

In 1998, AIAM amended House Bill 5654, which repealed Public Act No. 306 and made design professionals liable for only those phases of construction for which they have contracted. Unfortunately this bill died in committee due to democrat/republican in-fighting. AIAM attempted to introduce the same language in SB 805 in 1999, however, it was rejected by the Bill sponsor, Senator Rogers.

AIAM is currently evaluating another opportunity to introduce the same legislation in 2000. We will keep you informed as plans unfold.

The following excerpt is from Article 20 of The Occupational Code, PA 299 of 1980, and contains the sections dealing with the most frequently asked questions about the law. For a complete text, call the Department of Consumer & Industry Services 517-335-1669 in Lansing.

339.2008 Sealing documents requiring governmental agency approval or record; projects involving overlapping of architecture and engineering professions; sealing documents not prepared by licensee prohibited.

Sec. 2008. (1) A plan, plat, drawing, map, and the title sheet of specifications, an addendum, bulletin, or report or, if a bound copy is submitted, the index sheets of a plan, specification, or report, if prepared by a licensee and required to be submitted to a governmental agency for approval or record, shall carry the embossed or printed seal of the person in responsible charge.

- (2) It the overlapping of the professions of architecture and engineering is involved in a project, a licensed architect or licensed professional engineer who seals the plans, drawings, specifications, and reports may perform services in the field of the other practice if the services are incidental to the architectural or engineering project as a whole.
- (3) A licensee shall not seal a plan, drawing, map, plat, report, specification, or other document not prepared by the licensee or under supervision of the licensee as the person in responsible charge.

History: 1980, Act 299, Imd. eff. Oct. 21, 1980.

339.2009 Renewal of license; requirement.

Sec. 2009. A demonstration of continuing professional competence shall be required for renewal of a license. History: 1980, Act 299, Imd. eff. Oct. 21, 1980; -Am. 1988, Act 463, Eff. Sept. 1, 1989.

339.2010 Firm; practice of architecture, professional engineering, or professional surveying; approval of nonlicensed principal and principal's firm; report; person in responsible charge at each place of business; exception.

Sec. 2010. (1) A firm may engage in the practice of architecture, professional engineering, or professional surveying in this state, if not less than 2/3 of the principals of the firm are licensees.

- (2) However, a nonlicensed principal and the principal's firm shall apply for and receive an approval from the department to engage in the practice of architecture, professional engineering, or professional surveying, if the conduct of the firm and its principals comply with rules promulgated by the department.
- (3) Upon request by the department, a firm shall report to the department the names and addresses of its principals, persons in responsible charge, unlicenced principals, and any other information the department considers necessary.

(4) A firm shall employ a person in responsible charge in the field of services offered at each place of business in this state where services are offered by the firm, except at a field office which provides only a review of construction.

History: 1980, Act 299, Imd. Eff. Oct. 21, 1980; -Am. 1992, Act 103, Eff. Sept, 1, 1992.

339.2011 Construction of public work involving architecture or professional engineering; requirements; exception.

Sec. 201 1. (1) Except as otherwise provided in subsection (2), the state or a county, city, township, village, school district, or other political subdivision of this state shall not engage in the construction of a public work involving the practice of architecture or professional engineering unless all of the following requirements are met:

- (a) The plans and specifications and estimates have been prepared by a licensed architect or licensed professional engineer.
- (b) The review of the materials used and completed phases of construction is made under the direct supervision of a licensed architect or licensed professional engineer.
- (c) Each survey of land on which the public work has been or is to be constructed is made under the supervision of a licensed professional surveyor.
- (2) This section does not apply to a public work for which the contemplated expenditure for the completed project is less than \$15,000,00.

History: 1980, Act 299, Imd. Eff. Oct. 21, 1980;-Am. 1981, Act 93, Imd. Eff. July 1, 1981;-Am. 1992, Act 103, Eff. Sept. 1, 1992,

339.2012 Persons exempted.

Sec. 2012. The following persons are exempt from the requirements of this article:

- (a) A professional engineer employed by a railroad or other interstate corporation, whose employment and practice is confined to the property of the corporation.
- (b) A designer of a manufactured product, if the manufacturer of the product assumes responsibility for the quality of the product.
- (c) An owner doing architectural, engineering, or surveying work upon or in connection with the construction of a building on the owner's property for the owners own use to which employees and the public are not generally to have access.
- (d) A person not licensed under this article who is planning, designing, or directing the construction of a residence building not exceeding 3,500 square feet in calculated floor area. As used in this subdivision and section 2014(e), "calculated floor area" means that portion of the total gross area,

measured to the outside surfaces of exterior walls intended to be habitable, including a heater or utility room, but not including a crawl space; an unfinished and nonhabitable portion of a basement or attic; or a garage, open porch, balcony, terrace, or court.

(e) A person who is licensed to engage in the practice of architecture, professional engineering, or professional surveying in another state while temporarily in this state to present a proposal for services.

History: 1980, Act 299, Imd. Eff. Oct 21, 1980:—Am. 1992, Act 103, Eff. Sept. 1, 1992

339.2013 Issuing license to person holding certificate of qualification or registration of another state or national council; equivalency; temporary license prohibited; review of application of individual seeking relicensure or reinstatement.

Sec. 2013. (1) The department, upon application, shall issue a license to a person who holds an appropriate certificate of qualification or registration issued by proper authority of a board of registration examiners of another state or national council acceptable to the department and the board, if the requirements for the registration of architects, professional engineers, or professional surveyors under which the certificate of qualification or registration was issued are determined to be equivalent by the appropriate board. A board under this article shall not issue a temporary license as provided under section 213.

(2) The appropriate board shall review the application of an individual who seeks relicensure or reinstatement 3 or more years after the expiration of the individual's most recent license if the individual does not meet the requirements for licensure in force at the time of application for relicensure or reinstatement.

History: 1980, Act 299, Imd. Eff. Oct. 21,1980;-Am. 1981, Act 83. Imd. Eff. July 1. 1981;-Am. 1988, Act 463, Eff. Sept. 1, 1989;—Am. 1992. Act 103. Eff. Sept. 1, 1992.

339.2014 Prohibited conduct; penalties.

Sec. 2014. A person is subject to the penalties set forth in article 6 who commits one of the following:

- (a) Uses the term "architect", "professional engineer", "land surveyor", "professional surveyor", or a similar term in connection with the person's name unless the person islicensed in the appropriate practice under this article.
- (b) Presenting or attempting to use as the person's own the license or seal of another.
- (c) Attempting to use an expired, suspended, or revoked license.
- (d) Using the words "architecture", "professional engineering", "land surveying", "professional surveying", or a similar term in a firm name without authorization by the appropriate board.
- (e) Submitting to a public official of this state or a political subdivision of this state for approval, a permit or a plan for filing as a public record, a specification, a report, or a land survey which does not bear one or more seals of a licensee as required by this article. This subdivision does not apply to a public work costing less than \$15,000.00 or a residential building containing not more than 3,500 square feet of calculated floor area.

ADMINISTRATIVE RULES, BOARD OF ARCHITECTS DEPARTMENT OF CONSUMER AND INDUSTRY SERVICES BOARD OF ARCHITECTS GENERAL RULES

(By authority conferred on the board of architects by section 308 of Act No. 299 of the Public Acts of 1980, as amended, being 339.308 of the Michigan Compiled Laws)

PART 1. GENERAL PROVISIONS

R339.15101 Definitions.

Rule 101. (1)As used in these rules:

- (a) "Act" means Act No. 299 of the Public Acts of 1980, as amended, being 339.101 et seq. of the Michigan Compiled Laws.
- (b) "Administrative secretary" means an employee of the department who is the chief administrative employee assigned to administer the act.
- (c) "Authorized representative" means the chairperson, vice chairperson, or such other member of the board or employee of the department as the board may formally designate.
- (d) "Board" means the board of architects.
- (e) "Department" means the department of licensing and regulation.
- (2) Terms defined in the act have the same meanings when used in these rules.

History: 1985 MR 8. Eff. Sept. 12, 1985.

NOTE: Effective September 1, 1991, the powers, duties and functions of the Michigan Department of Licensing and Regulation were transferred to the Michigan Department of Commerce, pursuant to Executive Order 1991-9. Effective May 15, 1996, the powers, duties and functions of the Michigan Department of Commerce were transferred to the Michigan Department of Consumer and Industry Services, pursuant to Executive Order 1996-2. After May 15, 1996, all references made to either the Department of Licensing and Regulation or the Department of Commerce in law or rule shall be construed to mean the Bureau of Occupational and Professional Regulation within the Michigan Department of Consumer and Industry Services.

R339.15102 Rescinded.

Rule 102. Legal process for the board may be served upon the chairperson of the board or the administrative secretary to the board at the Lansing office of the board or as otherwise provided by law.

History: 1985 MR 8, Eff. Sept 12, 1985. Recinded 1998. HR5, Eff. June 6, 1998

R 339.15103 Conduct of public meetings.

Rule 103. (1) For the purpose of this rule, "chairperson" means the person authorized to convene and moderate a meeting of a public body organized or housed within the department or any other person acting temporarily as convener or moderator.

- (2) Each person present shall be provided a reasonable opportunity to address a public meeting on an agenda item or a topic relevant to the public body which is not on the agenda if the person makes a request to the public body's offices or to the department before convening the meeting or to the chairperson before the conclusion of the meeting.
 - (3) A group of 5 or more persons may be asked to give

advance notice to the chairperson or department of its intention to attend a meeting of a public body so that an effort may be made to provide adequate space. However, such advance notice is not required.

- (4) The chairperson shall do all of the following:
 - (a) Conduct the public participation portion of the public meeting in an orderly and decorous fashion.
 - (b) Recognize each person wishing to speak within the time limits available.
 - (c) Allow for public comment on each agenda item.
 - (d) Allocate a specific time on the agenda for general public comments.
 - (e) Exclude a person from the meeting only for a breach of the peace actually committed at the meeting.
- (5) The chairperson may do any of the following:
 - (a) Limit the number of persons admitted to the meeting room if necessary to comply with public safety laws and regulations.
 - (b) Temporarily recess and promptly reconvene the meeting in a larger meeting room if more space is necessary.
 - (c) Impose reasonable limitations on time allotted for public comments.
 - (d) Inquire as to the interest or interests, if any, represented by a person addressing the meeting.
 - (e) To preserve the rights of all parties, prohibit a member of the public from addressing the meeting on the subject of an administrative law case pending before a board until a disposition of the case has been voted upon by the board.

History: 1985 MR 8. Eff. Sept. 12, 1985

R 339.15104 Declaratory rulings.

Rule 104. (1) A person who requests a declaratory ruling from the board as to the applicability of the act or these rules to a factual situation shall submit to the board a clear and concise statement of the factual situation for which the ruling is requested. A brief or other reference to legal authorities upon which the person relies may also be submitted.

(2) The board shall provide the person with a statement as to whether or not the board will issue a declaratory ruling, the reasons for its decision, and the time in which the board shall issue the ruling. A ruling shall set forth the state of facts upon which it is based, the legal authority upon which the board relies for its ruling, and the ruling itself.

History: 1985 MR 8, Eff. Sept. 12, 1985.

R 339.15105 Rescission. History: 1985 MR 8, Eff. Sept. 12,1985.

Rule 105. R 338.551 to R 338.563 and R 338.581 to R 338.588 of the Michigan Administrative Code, appearing on pages 2446 to 2453 of the 1979 Michigan Administrative

Code, are rescinded insofar as these rules pertain to architects.

History: 1985 MR 8, Eff. Sept. 12, 1985.

PART 2. LICENSING CRITERIA

R 339.15201 Adoption by reference; experience credit; professional experience practice requirement; examination; transcripts.

Rule 201. (1) The board adopts the "Performance Criteria" of the national architectural accrediting board as found in the January, 1982, publication entitled "NAAB - Criteria and Procedures" as the board's determinant of the acceptability of a first professional degree in architecture. The "Performance Criteria" of the national architectural accrediting board may be purchased at a cost of \$2.50 from the National Architectural Accrediting Board, 1735 New York Avenue, NW, Washington DC 20006. The criteria may also be purchased at a cost of \$2.00 from the Michigan Board of Architects, P.O. Box 30018, Lansing, MI 48909.

(2) An applicant with an architectural degree from a program accredited by the national architectural accrediting board shall possess evidence of a degree acceptable to the board, and will be granted 5 years of experience credit for such a degree.

(3) An applicant shall have 8 calendar years of professional architectural experience after high school graduation, or its equivalent, before he or she may be admitted to the professional architects' examination. Before July 1, 1984, this requirement shall include a minimum of 4 years of education credits and a minimum of 3 years of training credits. After July 1, 1984, the 8-year professional experience practice requirement shall include 5 years of education credits and 3 years of training credits. The following types of education credits are deemed acceptable as required by the act:

Type of Degree	Maximum Experience Credit Granted for Education	
(a) First professional degree in architecture, bachelor's or master's, where the degree program meets the criteria adopted by subrule (1) of this rule	5 years	
(b) First professional degree in architecture, bachelor's or master's, where the degree program does not meet the criteria adopted by subrule (1) of this rule, but is acceptable to the board.	4 years	
(c) Foreign architecture or architectural engineering degree acceptable to the board as meeting the criteria adopted by subrule (1) of this rule after review of transcript.	4 years	
(d) Bachelor of architectural engineering degree acceptable to the board after review of transcript. After July 1, 1984, this degree is not acceptable.	4 years	
(e) Foreign pre-professional baccalaureate degree in architecture and acceptable to the board after review of transcripts. After July 1, 1984, this degree is not acceptable.	4 years	

(4) Experience credit for acceptable education shall be granted in accordance with the provisions of subrule (3) of this rule, subject to the following conditions:

(a) An applicant working full-time or part-time obtaining experience as set forth in R 339.15202 and simultaneously earning formal education credits as required by law from a college or university through evening or part-time course work shall be given credit not to exceed the actual calendar time elapsed.

(b) When credits are submitted from more than 1 college or university, they shall be evaluated on the same basis as by the school last attended.

(5) An applicant shall provide transcripts and other documents as may be required by the board for evaluation and determination of the acceptability of the applicant's education. History: 1985 MR 8, Eff. Sept. 12, 1985.

R 339.15202 Credit for professional experience.

Rule 202. (1) Credit for professional experience required by the act shall be granted for verified experience or practical training in accordance with the following provisions:

Type of Experience	Maximum % Credit Allowed	Maximum Credit Allowed
(a) Practical training of 3 or more continuous months, before acquisition of first professional degree in architecture, in offices of licensed or registered architects who are practicing as principals.	100%	no limit
(b) Experience as an employee in the offices of licensed or registered architects after acquisition of first professional degree in architecture.	100%	no limit
(c) Experience gained by completing an internshipprogram at the professional level as approved by the board.	100%	no limit
(d) Experience as a licensed or registered architect practicing as a principal or as a manager of the architectural activities of an agency or organization described in subdivision (g) or (h) of this subrule; in either case, with a verified record of substantial practice.	100%	no limit
(e) Teaching or research in an architectur- al program defined as acceptable to the board in subrule (2)(c) of this rule.	100%	1 year
(f) Employment by government agencies, engineers, general contractors, interior designers, landscape architects, or city planners in areas directly related to con- struction, and those self-employed in one of the preceding occupations.	50%	1 year
(g) Employment by government agencies, including the military, when diversified and comparable toemployment in the office of a licensed or registered architect practicing as a principal, and if such work is directly related to architectural work in a recognized training program and under the direct supervision of a licensed or registered architect employed in the capacity of a manager of an agency's architectural activity.	100%	2 year

(h) Employment by organizations that have employees performing architectural services in connection with projects used or owned by such organizations, if diversified and comparable to employment in the office of a licensed or registered architect practicing as a principal, and if such work is directly related to architectural work in a recognized training program and is under the direct supervision of a licensed or registered architect employed in the capacity of manager of the organization's architectural activity.	100%	2 years
(i) Credits toward a second professional degree (master's or doctoral) in architecture when such credit is acceptable to the board and after review of transcripts.	100%	1 years

- (2) Credit for professional experience required by the act shall be subject to all of the following conditions:
 - (a) Training before graduation from high school, or its equivalent, is not accepted.
 - (b) Every applicant shall earn at least I year of training credit as specified in subrule (I)(b) of this rule and shall earn it after completing the education requirement.
 - (c) One year of teaching, as used in subrule (1)(e) of this rule, means full-time teaching for 2 semesters, 2 trimesters. or 3 quarters.
 - (d) If training is earned by work with such agencies as vista, peace corps, and community design centers, the applicant shall submit a certified statement with the application outlining briefly, but concisely, the applicant's duties, responsibilities, and the names and professional status of supervisory personnel. For credit to be granted under this category, training shall be in areas directly related to architecture.
 - (e) To be acceptable, training earned in categories specified in subrule (I)(a) to (I) ofthis rule shall be for a continuous period of not less than 3 months.
 - (f) Verified work experience earned part-time, not less than 20 hours a week, shall be acceptable for 50% work experience credit as described in subrule (1)(a), (b),
 - (f), (g), and (h) of this rule, when such part-time experience is of not less than 3 months' duration.
- (3) An applicant shall have the employers or supervisors, or both, where he or she has been employed submit to the board verification of experience forms and other references as required by the act. Decisions regarding acceptable experience and credit granted for experience shall be based upon evaluation of this information by an authorized representative of the board.
- (4) Notwithstanding the provisions of subrules (2) and (3) of this rule, credit for an internship program shall be subject to the following provisions:
 - (a) Submission of a certificate of completion of the intern development program of the national council of archi tectural registration boards shall be accepted as evidence of completion of architectural experience acceptable to the board. The board adopts by reference the standards set forth in the publication, "IDP Training Guidelines," published in July, 1985, by the national

council of architectural registration boards. Copies of IDP Training Guidelines may be obtained from the Michigan Board of Architects, Department of Licensing and Regulation, P.O. Box 30018, Lansing, MI 48909, and from AIA-NCARB IDP Headquarters, 1735 New York Avenue NW, Suite 700, Washington DC 20006, without charge.

- (b) Other internship programs shall be reviewed on an individual basis and approved if the board considers the training comparable to the program adopted in subrule (a) above. (c) The certificate of completion of an approved internship program shall also be evidence of completion of the requirement that an applicant submit 5 references as required by section 2006(I) of the act.
- (5) Effective January 1, 1992, only experience gained through completion of an internship approved by the board shall be deemed to qualify an applicant to take the professional portion of the examination.

History: 1985 MR 8, Eff. Sept. 12,1985, 1989 MR 2, Eff. Mar. 7, 1989.

R339.15203 Rescinded.

Rule 203. The examinations offered shall be the national council of architectural registration board's syllabus or comparable syllabus as jointly adopted annually by the board and the department.

History: 1985 MR 8, Eff. Sept. 12,1985. Rescinded 1998 MRJ, Eff. June 6 1998

PART 3. LICENSURE, RECIPROCITY, AND RENEWAL

R 339.15301 Licensure; seal design, replacement, use, validation, and submittal to board.

Rule 301. (1) After meeting the licensing requirements prescribed by the act and these rules, an applicant shall be licensed by the department according to the act.

(2) The seal of an architect as required by the act shall have the following design:

No other design for a seal shall be used. An embossed seal or rubber stamp from 4 to 5 centimeters in diameter may be used.

- (3) A licensee acquiring a new replacement seal shall file an imprint of the seal with the department, and the licensee may be required to do so thereafter upon request by the department.
- (4) A licensee's seal shall be used by the licensee whose name appears thereon for so long as the license remains in effect. A licensee shall be responsible for the security of the licensee's seal.
- (5) A licensee shall validate personal use of the seal by placing the original signature of the licensee adjacent to each seal impression or stamping.

History: 1985 MR 8, Eff. Sept. 12, 1985.

339.15302 Licensure by reciprocity; evidence of eligibility

required; application; current certificate.

Rule 302. An applicant is eligible for licensure by reciprocity if the applicant holds a current valid certificate of licensure or registration as an architect issued by a board of another state or jurisdiction and submits verification of education and professional (experience as required by the act and these rules, or submits a current certificate from the national council of architectural registration boards attesting to the attainment of required education, experience, and state board examinations, which shall be evidence for evaluation of the applicant's qualifications for licensure. An applicant shall be acceptable for licensure by reciprocity who holds a current, valid license in another state and who met Michigan requirements at the time of initial registration in that state.

History: 1986 MR 8, Eff. Sept. 12, 1985.

PART 4. STANDARDS OF PRACTICE AND PROFESSIONAL CONDUCT

R 339.15401 Standard of care and competence; responsibility for complying with building laws and regulations; professional services.

Rule 401. (1) In practicing architecture, an architect shall act with reasonable care and competence and shall apply the technical knowledge and skill which is ordinarily applied by architects of good standing who practice in the same or similar locality.

(2) In designing a project, an architect shall take into account all applicable state and municipal building laws and regulations. While an architect may rely on the advice of other professionals, such as attorneys, engineers, or other qualified persons, as to the intent and meaning of such laws and regulations, an architect shall not knowingly design a project in violation of such laws and regulations.

(3) An architect shall undertake to perform professional services only when he or she, together with those whom the architect may engage as consultants, is qualified by education, training, and experience in the specific technical areas involved.

(4) Professional services shall be offered and performed as follows:

(a) A licensee shall undertake to participate only in those phases of a project in which the licensee is competent by education, training, and experience. In the areas of a project involving professional engineering or land surveying in which the licensee lacks competence, the licensee shall retain licensed or registered professional associates for those phases of that project.

(b) An architect shall not sign or affix a seal as architect to any plans, specifications, drawings, or other related documents or work products which were not prepared by the licensee or under the licensee's direction and supervision.

History: 1985 MR 8, Eff, Sept. 12,1985.

R 339.15402 Compensation; disclosure of business association or financial interest; contract decision.

Rule 402. (1) An architect shall not accept compensation for services from more than I party on a project, unless the circumstances are fully disclosed in writing and are agreed to in writing by all interested parties.

(2) If acting as the interpreter of building contract documents and the judge of contract performance, an architect shall render decisions impartially.

History: 1985 MR 8, Eff. Sept, 12,1985.

R 339.15403 Public statements; representation of qualifications; misrepresentation of work responsibility; reporting violations of rules.

Rule 403. (1) An architect making public statements on architectural questions shall disclose when he or she is being compensated for making such statements.

(2) An architect shall accurately represent to a prospective or existing client or employer his or her qualifications.

(3) An architect shall not misrepresent the degree of responsibility in connection with work for which he or she is claiming credit to a client, potential client, or the public.

(4) An architect shall report a violation of these rules by another architect to the board.

History: 1985 MR 8, Eft. Sept. 12,1985.

THREE DETROIT ARCHITECTS RECEIVE NATIONAL AIA HONORS

Three Detroit architects were inducted into the College of Fellows of the American Institute of Architects in Philadelphia, Pennsylvania on May 4. Out of a membership of 66,000, there are fewer than 2,300 AIA members distinguished with the honor of fellowship. Founded in 1952, the College of Fellows includes approximately 5% of the total AIA membership. Fellowship is conferred on architects who have at least 10 years of membership in AIA and who have made significant contributions in five specific areas: design, education, leadership, environment and public service.

Eric Hill, FAIA is vice president, director of urban design and planning, for Albert Kahn Associates, and is founding principal and managing director of The Albert Kahn Collaborative, AKA's subsidiary focused on urban and architectural revitalization. Additionally, Hill serves as adjunct professor of architecture at the Taubman College of Architecture and Urban Planning, University of Michigan. Creatively integrating practice and education, Hill has partnered with the University to renew the professional practice curriculum and develop one of the nation's first practice courses based entirely on case study methodology. His course writings have been adopted at other architecture schools. Hill received his PhD in Architecture (1976) and bachelor's degree from the University of Pennsylvania (1970). He was granted his Masters in Architecture from Harvard University (1972). He lives in Bloomfield Hills.

Thomas O'Connor, FAIA teaches what he practices: proper construction technology and solutions to building problems. O'Connor, vice president and director of building technology at SmithGroup Inc., has authored industry standards, developed innovative construction theory, conducted research, published and lectured on technical issues and instructed fellow professionals and students. Through his 19-year involvement in the American Society for Testing and Materials (ASTM), he has participated in writing over 40 ASTM standards used globally, and was principal author of five standards. A graduate of Lawrence Technological University with a bachelor's degree in architectural engineering (1964), O'Connor has taught at the University of Detroit Mercy for 25 years. He has also lectured at Massachusetts Institute of Technology, Eastern Michigan University, University of Michigan, and others. He lives in Livonia.

Victor Saroki, FAIA is president of Victor Saroki & Associates Architects, PC in Birmingham, which is recognized as one of the community's most creative architectural firms. Projects encompass retail, residential, historic renovation, entertainment and commercial developments with an emphasis on interior architecture. Saroki's dedication to the belief that architecture can be achieved at every level, from interior details to city spaces, has led to recognition of his work by over 35 design awards. A frequent lecturer on design for governmental planning boards and civic/art groups, Saroki uses examples of his designs that improve the physical urban environment. He earned his degree at Lawrence Technological University (1980). He is a regular speaker and design juror at several schools of architecture including Lawrence Technological University, University of Detroit Mercy and University of Michigan. He lives with his family in Birmingham.

A reception was held on April 13 at the Beaubien House in downtown Detroit - headquarters of the AIA Michigan and AIA Detroit - to recognize the three new members of the College of Fellows.

Those advanced to Fellowship can use "FAIA" after their names in recognition of their contributions to architecture.

Eric Hill, FAIA

Thomas O'Connor, FAIA

Victor Saroki, FAIA

AIA MICHIGAN GOLD MEDAL

The Gold Medal is awarded to recognize an individual architect who has clearly demonstrated distinguished leadership in any phase of the profession over an extended period of time. The award is made in recognition of notable contributions to the AIA and outstanding achievement in one or more areas of professional endeavor. No more than one award will be granted in one year.

GOLD MEDAL GOES TO DETROIT ARCHITECT ARNOLD MIKON, FAIA

The Gold Medal is the highest accolade a Michigan architect can earn. Mikon decided to be an architect in the 10th grade and now is chair and CEO of The SmithGroup Companies, the oldest and one of the largest continuously operated architectural - engineering practices in the United States. In 1996 he was inducted into the College of Fellows of the American Institute of Architects.

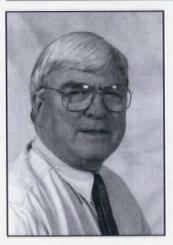

Arnie is a civic leader and downtown Detroit booster. His firm recently completed an interior restoration of the historic Guardian Building for their corporate offices. The building was designed in 1922 by his firm and the move represents a return to its roots. As good fortune would have it, the firm earned a design award for their work on the building this year. He chaired the Detroit Central Business District Association and helped to produce a land use plan that led to the city's designation as Federal Empowerment Zone.

He has committed his time and his firms resources to promoting AIA locally and nationally. He has been president of AIA Detroit, chaired the political action committee and is a member of the Large Firm Round Table.

Arnie has a Bachelor of Architecture and Master of Business Administration from the University of Michigan and a year at the Detroit College of Law. He lives in Huntington Woods with his wife, Deena, the twins Beth and Renee and son Bradley.

Arnold Mikon, FAIA

UP-ARCHITECT JAMES BLOMQUIST EARNS HASTING'S AWARD

James Blomquist, AIA

Iron Mountain architect James Blomquist, AIA earned the coveted Robert Hastings Award for 2000. This award was created following the death of Hastings in 1978. He had been president of the Institute and chairman of the board at Smith Hinchman and Grylls (now The SmithGroup) in Detroit.

Blomquist was recognized for his long term service on the Michigan Board of Architects, the body that sets standards for architectural licensing. He served two four year terms and was Chair, vice chair and secretary. During his tenure, he was active in the National Council of Architectural Registration Boards and was on the committee responsible for writing and grading architectural registration exams. He was a master juror evaluating candidates' design qualifications from 1991-93.

He began his career in the North at a Green Bay architectural firm following his graduation from the University of Illinois. He soon found himself back home in Iron Mountain where he has designed schools, public buildings, the Ford Airport in Dickinson County and even a ski jump. He is a well rounded professional who must often come up with solutions for a wide variety of architectural problems. His son, Jim, joined the firm following graduation from the University of Michigan.

Jim is a charter member of the Upper Peninsula Chapter of the American Institute of Architects and was president in 1995 and continues to be active.

ROBERT F. HASTINGS AWARD

Created in 1978 to honor the late Robert F. Hastings, FAIA, first recipient of the Institute's Kemper Award. It is given in recognition of distinguished and significant service to the profession. The recipient shall have demonstrated widely recognized contributions to the betterment of the quality of the urban environment. The recipient shall be a recognized leader in the community. Current members of the board are not eligible. The Hastings Award may be given posthumously.

YOUNG ARCHITECT OF THE YEAR MICHAEL CORBY, AIA

Michael Corby, AIA

This award, created in 1991, recognizes proficiency and exceptional accomplishments in, and contributions to the profession by a member of AIA Michigan for a minimum of three years who is 40 years old or younger during the calendar year of the award. The Young Architect of the Year must show dedication to the ideals of AIA-MI and service to the community.

1996	William Hartman, AIA
1997	None
1998	Steven Flum, AIA
1999	John Davids, AIA
2000	Michael Corby, AIA

Michael Corby, AIA, founding principal with Integrated Architects, is the 2000 American Institute of Architects- Michigan Young Architect of the Year. The Young Architect Award is set aside for architects who are under 40 years of age but have already evidenced exceptional talent, outstanding commitment to the profession and leadership in the community.

For a young man, Mike Corby has accomplished a lot since his graduation for the University of Michigan Alfred A. Taubman College of Architecture and Planning. He, with partner Paul Dickinson, AIA, formed Integrated Architects that today employs 52 people. Their head-quarters in Grand Rapids has won several design honor awards. In addition, it was designed to interact with the community. Since its opening two year ago, 2,500 people have toured the building; attended fund raising event for community projects and gathered for lectures. It was designed specifically to inspire and educate. Common building materials were chosen and used in a creative an uncommon application.

Mike is vice president of AIA Grand Valley. When he was in Ann Arbor, he served as treasurer of the Huron Valley Chapter and developed the "Chalk In The Park" program. A similar program became "Chalk the Walk" in Grand Rapids during the Festival of Arts there.

In his spare time, he is a Den Leader for the Cub Scouts, serves on design juries for the University of Michigan and Calvin College and is a resource to the building committee for Wealthy School. His firm has developed expertise in the Healthplex movement where ambulatory care, fitness and health promotion are brought together in one facility and he speaks at state and national conferences on the subject.

AIA PRESIDENT'S AWARD GOES TO DEAN NEVILLE CLOUTEN

Dean Neville Clouten, FRAIA

Neville Clouten, FRAIA, dean of the college of architecture and design at Lawrence Technological University is the winner of the President's Award. This award is given in recognition of exceptional contributions to the profession for architects who practice in a corporate or university setting.

Dr. Clouten began his career in New South Wales, Australia and is a Fellow of the Royal Australian Institute of Architects. His first architecture degree came from the University of Sydney. He went on to Ohio State for his master's degree and then to Edinburgh University in Scotland for his Ph.D. He came to Michigan to chair the Department of Architecture at Andrews University in Berrien Springs. He has been Dean at Lawrence since 1990.

The College of Architecture and Design enrolls 600 undergraduate students in architecture and 120 students in the interior design and architectural illustration. Approximately 70 students are enrolled in graduate degrees. The College employs 22 full time faculty, 70 adjunct faculty and 10 staff.

A unique part of his work is as Curator of the Frank Lloyd Wright designed Affleck House in Bloomfield Hills. He has made this outstanding example of Wright's Usonian style house a venue for Master Classes and reflective practice studios. It is also accessible to the community as an historic building.

He is an advocate for collaborative design for schools, community buildings, campuses and neighborhoods. Collaborative Urban Design studies in southeastern Michigan include Royal Oak, Pontiac, Monroe, Novi, and Detroit where a design studio is now located in the New Center Area.

In 1998 he led a delegation from Lawrence Technological University to the United Nations in New York and coordinated the exhibition of student projects on the Ssese Islands, Lake Victoria, Uganda. Since 1989 he has been consultant to the Ssese Islands Development Project.

PRESIDENT'S AWARD

The President's Award began in 1992. It was created to honor architects in the education and corporate field who have made exceptional contributions to the profession in academia or business.

1992	Leo Gerald Shea, FAIA
1993	No Award Program
1994	Robert Beckley, FAIA
1995	
1996	Robert F. Fearon, AIA
1997	Joseph Derkowski, AIA
1998	Tivadar Balogh, AIA
1999	Robert Metcalf, FAIA
2000	Neville Clouten, FRAIA

BARR, STALEY AND WAGNER BECOME HONORARY MEMBERS

Noted sculptor **David Barr** has work on display all over the world but many of his most interesting works have been a part of large architectural commissions in Michigan. He was named a Honorary Member of AIA Michigan for his efforts to meld art and architecture.

A sampling of his work with architects includes the "Polaris Ring" at the Michigan Library Museum Archives in Lansing for William Kessler, FAIA; "Revolution I" at the Chrysler World Headquarters in Auburn Hills designed by Ralph Youngren, FAIA for SH&G (now the SmithGroup) and the development of Mt. Elliot Park in Detroit for Schervish, Vogel, Merz.

Barr built his house and studio with his bare hands from plans drawn up by his friend Laurence Booth, a Chicago architect, on a four acre tract in a cornfield in Novi. He also planted trees and dug a pond. This land has become a testing site for his sculpture. The house won a distinguished building award from the Chicago Chapter - AIA. It was published in Global Architecture, House and Garden and Architectural Record.

Originally David enrolled in Wayne State University's engineering school (his father was an engineer at Chrysler). After switching his major to industrial design he ultimately earned his masters of fine arts from Wayne State.

He is founder and artistic director for the Michigan Legacy Art Park in Thompsonville near the Crystal Mountain Resort. It is an outdoor laboratory for the state's artists, poets and naturalists. It is a walking trail where people come to reflect on nature, poetry and roadside sculpture.

Ronald Staley was picked to be an Honorary Affiliate Member because he is a master builder and a powerful force for historic preservation on the state and national scene.

Staley has twenty years in the construction business, the last sixteen with the Christman Company in Lansing. In 1992, he developed a historic preservation program for the company that has led to national prominence. He is a member of the prestigious Association for Preservation Technology International and spoke at its annual conference in Alberta, Canada.

He has directed the restoration of several Michigan landmarks including the Capitol Building that won an National AIA Award, the Governor's House on Mackinac Island, Henry Ford Estate and Cranbook Kingswood School roofs, the Frauenthal Theater in Muskegon, a number of campus buildings throughout the state and the Kirk-In-The-Hills Tower. Another of his projects, the Michigan Stove, also received an Honor Award this year.

He has given freely of his time and treasure to promote an historic preservation ethic. He is an officer and served on the executive committee of the Michigan Historic Preservation Network, the largest nonprofit organization in the state focused on the protection of our architectural legacy. He is a workshop leader and participant in Eastern Michigan University's Trade School at the Fayette Historic State Park.

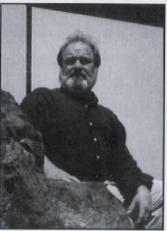

Ron and his family live in Brighton and he has just earned a pilots license after taking lessons at the Livingston County Air Port.

Stephen Wagner, CAE, Executive Director of the American Consulting Engineers Council/Michigan, is the third Honorary Affiliate Membership awarded this year. The induction occurred during the AIA Michigan Convention on April 7th in Mt. Pleasant at the Soaring Eagle Resort.

Wagner has been director of the Consulting Engineers Council for thirty years. ACEC is an association for consulting engineers, architectural engineers, surveyors and related scientific companies. There are 120 member firms in Michigan employing 4,000 people. Nationally, some 5,000 companies are represented. Architects and engineers are in regular contact through their directors and elected leaders. Steve is a strong leader in the Architect - Engineer Legislative Committee.

In addition to a degree in communication arts from Michigan State University, he is a graduate of the U. S Chamber of Commerce Institute for Organization Management. He a member of the Capitol Club, a Lansing based organization made up of business and professional associations.

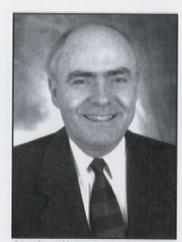

Barrr, Wagner and Staley join a list on Honorary Members that began in 1897 when Julius Melchers, the sculptor who carved the figures on the old Detroit City Hall, was named. The list is a who's who of artists, patrons of the arts and civic, cultural and business leaders who have made contributions to architecture and the built environment.

WHAT DOES IT MEAN?

In order to make this directory more useful for non-architect readers and clients, we provide the following glossary:

AIA

Any architect who is currently entitled under state law to practice architecture is eligible to be an Architect Member. Good standing in the profession and in the community shall be demonstrated. Architect Members may use, in connection with their names and titles, "Architect Member of the American Institute of Architects."

The acronym AIA is copyrighted and its specific use is limited to an individual architect member. This designation following the name means that the architect is a member in good standing of the American Institute of Architects.

FAIA

These initials signify that an individual architect has become a Fellow in the American Institute of Architects. It means that a jury of peers has examined the architect for extraordinary accomplishments and exceptional leadership.

AIA-E The letter "E" stands for Emeritus and it signifies that an architect member has maintained membership for 15 years and has reached the age of 70; or, has reached the age of 60 and is retired; or, is incapacitated so as to be unable to work in the profession.

Associate AIA

Associate members are individuals without architectural license who meet any of the following requirements:

- Employed under the supervision of an architect in a professional or technical capacity, or
- Faculty members in a university program in architecture, or
- Are eligible by education or experience and are in circumstances recognized by licensing authorities as constituting credit toward architectural license, or
- Have a professional degree in architecture, or
- Have an architectural license or the equivalent from a non-licening authority and demonstrates honorable standing in the profession in the local in which they are licensed. Such persons may be residents within or outside the U.S.

PΑ

Professional Affiliates are construction industry teammates such as mechanical, electrical and structural engineers, artists, planners, interior designers who complete the roster of a well-rounded professional organization.

(Editor's Note: Much of the information in the FIRM PROFILE was submitted by the individual firms listed. Although every effort was made to provide all the firms the opportunity to be listed correctly, AIA Michigan does not verify the accuracy of the information received. As in any directory of this size, errors may occur. To compound this inherent problem in directory creation, we are constantly faced with area code changes. We apologize for any typographical mistakes. We welcome written corrections and additions.)

HOW TO HIRE YOUR ARCHITECT

Finding a Qualified Architect

Selecting the best architect for your next project can be a confusing experience. Whether you are an individual building for the first time or part of a large organization that builds periodically you need reliable information.

To help ensure that the owners receive quality architectural services the Michigan Board of Architects examines, licenses, and regulates architects. All architects have a numbered seal that they must be use to stamp drawings for issuance to local building authorities. The use of the title "architect" by an unlicensed person, or the use of an architect's seal to stamp drawings not made under his or her direct supervision are both illegal practices. To find out whether an architect is licensed to practice in Michigan or to report an illegal use of the title or seal one may call the State of Michigan, Board of Architects at 517-241-9253.

To get a license and the privilege to use the title "architect," Michigan architects will have completed a five-year degree in architectural studies. Many will have a Master of Architecture Degree. A three-year internship of diversified practical training then follows a candidate's education under the direct supervisory control of a practicing licensed architect. It is only then that they are eligible to tae the Architectural Registration Exam. The letters "AIA" after the name means that this architect subscribes to a Code of Ethics. It is an architect that works to earn Continuing Education Credits to be up-to-date on the latest building technology.

AIA Michigan offers a guide to licensed architects who publicize their experience in specific building types. PLACEMAKERS can be helpful in establishing a list of architects to consider when sending out a request for information (RFI).

AIA Michigan also has a publication on Qualitybased Selection (QBS) to guide owners through the selection process. A facilitator is available through QBS to work with you or your selection committee directly. Whether you plan to use the QBS procedure or your own selection process, the key is to develop definitive selection criteria.

Selecting Your Architect

Before selecting your architect you need to develop basic criteria specific to your project and make that available to prospective architects. Basic requirements may include the following:

- 1) List of functions
- 2) Approximate size
- 3) Projected starting dates and occupancy dates
- 4) Anticipated project budget and financing
- 5) Required services from your architect

Next you should request information and qualifications from several architects to evaluate your project. Successful projects result when clients and architects form cooperative professional business and often personal relationships. These relationships are formed early in the design process and clear communications, mutually understood expectations, and a willingness of both client and architect to understand and accept their individual responsibilities for realizing a successful project. A theme to rally around is the five C's: Chemistry, Capacity, Capability, Creativity, Commitment. The five C's focus on team resources, availability and relevant experience, design and technical skills and overall interest in your project.

Chemistry: Look at the architects specifically proposed for your project and see how well they have worked on similar projects. If you are dealing with just one architect for a smaller scale project, talk to other clients he or she has worked with to obtain information. If your project is larger and requires a team of

architects, talk to the users of a previous project on which they have worked. You should also evaluate the data on the resume. A second key aspect to consider is how well the architect or specific team will mesh with your culture and values. Are there techniques used by the architect that will simplify the working relationship and clarify the decision making process for you or within your organization? Has the architect or team of architects worked with clients or organizations similar to yours? Whether you are the sole authority or your organization has a hierarchy of decision makers, the architects should be comfortable with your decision making structure.

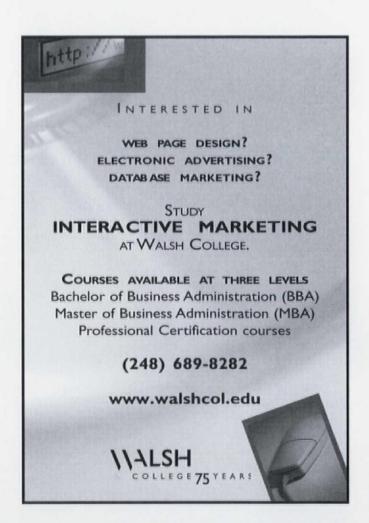

Capacity: Once you are satisfied with the architect or team of architects are they available for your project? Every owner is concerned about the ability of the selected architect to deliver the project effectively within the desired schedule. The real test of this question is the depth of resources available to the architect or project team. Can they handle your project schedule and adjust to changes you may require without jeopardizing other project commitments? You need data on concurrent project schedules to make this evaluation. Typically, architects are generalists and produce a great variety of projects. Has the architect delivered projects of similar size and complexity to your project?

Capability: Architectural firms come in many sizes and types. The average firm is made up of five to ten people. Many are smaller, with one or two people, and some are very large with many professionals on their staffs. Evaluate the experience of the architect or team of architects on recently constructed similar projects. Were these projects delivered within the required time and cost restraints? Have they delivered these projects with the level of quality that meets your expectations? Given the architects' experience on recent projects, are they able to solve issues specific to your project? Can the architect guide you or your organization through the design process and build a consensus with you and your key people?

Creativity: Design and construction is not a simple process. No two projects are alike, and each new building brings with it a unique mixture of needs, people, location and financing. Image, function, the user, technology, environment, construction phasing, operations and cost all influence the complexity of the problem. The creative process is a very subjective response to a given set of requirements. Interviewing the specific architect designated for your project is wise. The architect will bring an independent and fresh look at your project and suggest creative ways of meeting those needs. Ingenuity in both design and technology is equally important. The architects' design approach, including analysis of alternatives, may provide key insights into the ability of the architect to come up with a creative solution to your problem. Looking at the architects' past work and calling client references can also be very valuable. Take the time to evaluate past performances. Ultimately your search may yield more than one very qualified architect that meets your criteria for selection. Final choice may hinge on how interested the architect is in your project. The most thoughtful architects are as careful in selecting their clients as clients should be in selecting their architects.

Commitment: Is this an architect that you can trust with your project? Has the firm committed a key principal to the project or are they just the interview team? Do they understand emerging trends that affect you or your business and can they incorporate key elements into your project? By the firms location or by their demonstrated portfolio are they part of the fabric of the local or regional area? Do they understand community influences and concerns? Careful evaluation of each architect should lead to an effective choice and eventually to the successful completion of your project. We create livable communities one building at a time. An informed client and an innovative architect do a lot to insure the quality of the built environment.

(Most of the above information was written by Karen Swanson, AIA and Andy Vazzano, AIA. Additional copy is from Archipages, a publication of AIA Ilinois)

placemakers

Behind every issue of PLACE are PLACEMAKERS! But where are they located? Who do I call? What is thier specialty? the editors of Place are happy, once again, to include the Placemakers directory in this issue of Place Magazine.

This easy to use directory features an alphabetical listing of firms with location, specialty of practice, and a contact architect with whom to discuss your project. It is compiled as a resource for clients and other members of the building team in need of architectural service.

Participating firms are AIA Michigan members who support PLACE magazine with their projects, ideas and dollars. So take a look and find the firm best suited to your project! We are confident that it's there! For more information, please do not hesitate to contact:

The Fireblocker

EDW-C-LEVY CO.

Nothing Builds Better Block Than Levy Lightweight Blend. Specify Levy lightweight expanded slag masonry units and you give any structure the safety benefits of high-temperature fire resistance — with no significant increase in cost. And because they're so light, masons are able to lay more units every day, resulting in extremely high productivity with reduced labor and transport costs. So you end up with a more satisfied client.

- Expanded slag has a uniquely high fire rating — higher than any other masonry unit material
- Fire rating certified by Omega Point Laboratories, San Antonio, Texas (ASTM method E-119)
- 20% lighter than normal medium-weight block

Levy block is made from 100% expanded slag, a byproduct of steel production. So while its unique high strength and fire resistance are protecting your customer's investment, it is also helping to protect the environment.

For more information, call the Levy sales department at (313) 843-7200, or write us at 8800 Dix Avenue, Detroit, MI 48209.

AIA Contract Documents Software

AIA Contract Documents: Electronic Format for Windows(r) has more than 75 AIA contract documents to modify and print as needed. For more information or to request a license agreement for ordering the electronic documents, contact your local component AIA contract documents distributor or call 800-246-5030. Please note that shipping costs, ordering procedures, technical information and support are different for the electronic format version. This information should be obtained from the number above.

Free Publications

Copies of the AIA Contract Documents Price List (order #N710), You and Your Architect (order #N802), and AIA Contract Documents: The Foundation for Successful Public Building Projects (order #N718), are available at no cost and can be ordered toll-free at 800-365-ARCH (2724).

Notice: Because AIA contract documents are revised regularly, some may have been superseded by new editions.

Copyright: When ordering, please note that most AIA contract documents are copyrighted and generally may not be reproduced beyond the limited license granted, if any, in the instructions for that particular document. Therefore, original AIA contract documents should be purchased and used for each project.

General Information

AIA documents are revised regularly, some may have been replaced by new editions. The editions listed are the latest ones available. Documents may be ordered by phone or picked up Monday through Friday between 9:00a.m. and 4:00p.m. If walk in orders are very large, they may need to be picked up later in the day. All checks should be made payable to AIA Michigan.

Mail Orders

Orders must be paid for when they are shipped. No credit will be extended. Orders will be shipped within 3 days of receiving your check in the AIA office. Please fill out the form below.

Phone Orders

Orders must be paid for when they are shipped. No credit will be extended. Orders will be shipped within 4 days of your order being taken in the office with approved MasterCard/Visa.

Minimum Orders/Walk In Orders

Walk in orders - cash only - no checks - no minimum unless using a credit card. Credit Card - \$10.00 minimum. All phone orders \$20.00 minimum.

Shipping

All orders will be shipped VIA UPS ground. Special requests and overnight shipping must be requested at time of order (this is not guaranteed) and an additional charged will be added. Orders will be shipped within 4 days of order and payment received.

Keeping Tradition Alive

University of Notre Dame-Washington Hall

For a Marvin dealer near you, call Milliken Millwork at 1-800-433-8475

A Lesson In Longevitu: The University of Notre Dame has quite a reputation to uphold, so when they needed to replace the windows on two of their oldest buildings-Washington Hall built in 1881 and LaFortune Student Center built in 1883-they wanted a solution that would maintain the buildings' integrity on the National Register of Historic Places, as well as minimize the maintenance required on the hundreds of windows being replaced in all shapes and sizes. Marvin's solution was to create a brand new product using a combination of Single Hungs, Double Hungs, and Magnum Double Hungs, with extruded aluminum clad exteriors finished in a custom Irish Bronze and Irish Tan. The result was a perfect blend of form and function for this grand dame of academic institutions.

As a member of A.W.I. and our continued quest for quality in the manufacturing of casework and millwork in the construction industry, we are registered with A.W.I.'s Quality Certification Program in Premium Grade Construction. We are the first full service Contractor to have this certification within the State of Michigan. If we may assist you in anyway please do not hesitate to call us with any questions you might have during design and planning stages. You may visit our web site for a current listing of projects and history at www.focalpointltd.com

We specialize in architectural woodworking and renovations.

BASIC TO BETTER BUILDING:

DuPont Tyvek Commercial Wrap and StuccoWrap Weather-Resistant Membranes for Light Commercial Construction

Build more comfortable, energy-efficient structures with far fewer chances for damage from the deteriorating effects of water and moisture intrusion. DuPont Tyvek® CommercialWrap® and StuccoWrap® provide residential and commercial wall systems with superior air, bulk water and moisture vapor management and protection.

Tyvek CommercialWrap

Wrapped under a building's exterior facade, Tyvek® CommercialWrap® protects against air and water infiltration while allowing harmful moisture vapor to escape the wall cavity. CommercialWrap® has superior strength and durability, giving it 30% more water resistance and five times more air resistance than Tyvek® HomeWrap®. The result is greater protection against in-wall water damage, more effective installed R-value and year-round energy savings.

Tyvek StuccoWrap

StuccoWrap® provides excellent water management, like HomeWrap® and CommercialWrap® with the added benefit of assisting drainage via its specially engineered surface texture that channels water and moisture safely outside. Designed for both traditional and synthetic (EIFS) stucco systems in both commercial and residential construction. StuccoWrap® is superior in reducing susceptibility to cracking and improving stucco curing.

Don't forget DuPont Tyvek® Contractor Tape for sealing post-installation seams! A DuPont Tyvek® Architectural Binder containing product specifications and in-depth information is available from Hansen Marketing Services. Hansen also offers valuable continuing education opportunities with its "Managing Moisture and Solving Water Intrusion Problems" presentation: Code Officials: Earn 2 Act 54 credits in the Specialty category. Architects: Earn 2 C.E.U.s in Health, Safety, and Welfare. For more information, please contact Gerald Marquette at Hansen Marketing Services by calling 1-800-552-4877.

Washington Sall, center stage for theatre and cultural events at Notre Dame. Built in 1881, this modern Sothic structure was named by Father Sorin himself, Notre Dame's founder, in honor of his great hero, George Washington.

You've got to be good to go into Notre Dame and leave with a victory.

hen the University of Notre

Dame decided to replace the windows in two of the more historic buildings on its storied campus, all the major manufacturers wanted the job. But as they learned more about the size and scope of the project, the list began to dwindle. Since both buildings are on the National Register of Historic Places, Notre

Dame wanted windows with wood interiors that matched the appearance and profile of the originals. To minimize

The wood interiors of Marvin's windows are virtually identical to those installed a century ago.

For the exterior aluminum cladding, an appropriately-named custom color was created: Irish Bronze.

maintenance, another demand was aluminum clad exteriors. Marvin Windows and Doors emerged victorious. And designed and built 310 windows for the project, not one of which was a standard size. Not only that, but the casings were factory applied and a custom color for the exterior cladding was developed to replicate the 100 year-old originals. If you have a challenging commercial project, contact the company that has a reputation for winning the tough ones.

For more information or to request a Free Marvin Windows and Doors Commercial Capabilities CD Rom please call 1-888-553-9988. In Canada, 1-800-263-6161. www.marvin.com

Williams Scotsman's Partnership with Architects...

A Better Building Process.

In today's fast-paced world, traditional building methods can be costly, time-consuming, and unpredictable. A Williams Scotsman building can be ready for occupancy in about half the time and often for less money than a traditional building.

By partnering with Williams Scotsman, you can save your clients time and money. We can provide you with the modular building and site improvements your clients need.

Explore your many options with your local Williams Scotsman Representative. Call today and ask for our Major Projects Group at 800-782-1500.

HOW TO USE FAX-ON-DEMAND

We want this guide to be an effective resource for our members throughout the coming year when making their purchasing decisions.

As an additional benefit, we are offering a service called Fax-on-Demand. Participating advertisers are assigned a four-digit code (located in the Index to Advertisers). To access additional information about the advertiser's product and/or service, you only need to dial (410) 252-9595 from your fax machine, enter the four-digit code and PRESTO - you will receive additional information about their products and/or services.

A convenient buying resource!

Created For Life™

QUPOND

DECROFFACE.

Sandblasted Profile Concrete Masonry Units

"Creating classic looks with advanced technology"

The Decro-Face process harnesses the raw power of sandblasting to achieve a uniform natural texture on unit concrete surfaces.

Our greatly expanded selection of aggregate and color options allow you to create and achieve the look you want.

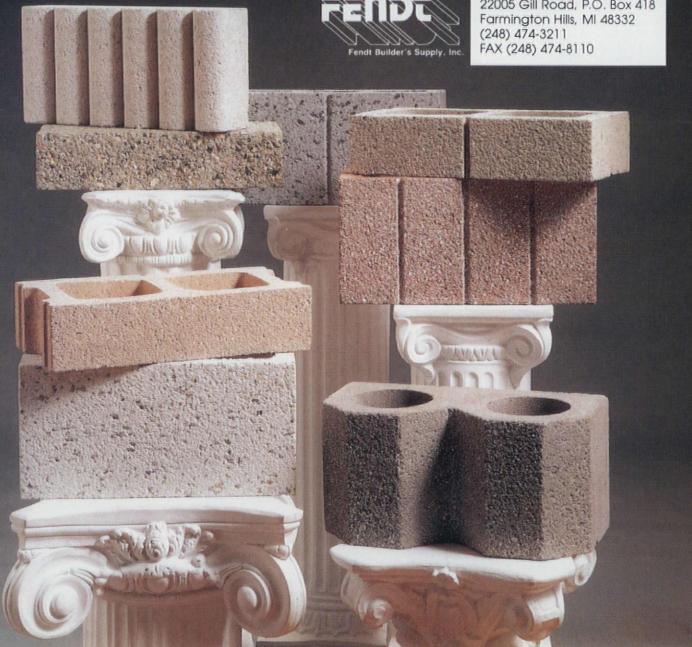

The capability to apply the Decro-Face process to any shape made—from bond beam

to bullnose, half-high units to brick and even paving stones—removes the usual restraints on creative and structural design.

The Decro-Face story is one of an entire new line of products: Decro-Face Profile CMU's, Decro-Pavers™, Decro-Brick™ and Decro-Graphics™. For a Decro-Face Designer's Kit or more information, please contact us.

AutoCAD Architectural Desktop

*automatic

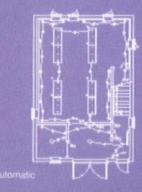

*automatic

automatic

Authorized Dealer 800-422-3946

*construction documentation automatically generated from 3D model

We just made your job a little bit more fun.

By automatically generating components and documentation from your design concepts, Architectural Desktop allows you to spend more time creating, and isn't that where the fun really is?

AutoCAD Architectural Desktop ensures data integrity throughout the entire design process. It smoothly bridges the gap between 2D production drafting and 3D modeling, and actually improves productivity at the same time.

Display Management features in AutoCAD Architectural Desktop™ benefits all phases of the design process.

conceptual design

- Solve design problems conceptually first.
- Generate presentation materials quickly and automatically.

design development

 Automatically generates walls, doors, windows, stairs and roofs to create the building design drawings.

construction documentation

 Construction documents are created and easily updated by referencing design files that contains representations for plan, reflected plan, drafting symbols and legends.
